**Explanation**

The end-user tariff for Mogas 95 increases mainly as a result of an increase of the purchase price as well as in the correction of the Surplus/Deficit component. The end-user tariff for Gasoil LSD increases mainly due to an increase in the correction of the Surplus/Deficit component. Furthermore, an additional tariff component has been included to cover the fuel costs for the operation of a part of the infrastructure of the refinery in order to guarantee the fuel supply on Curaçao. The increase of the end-user tariffs for LPG 100 and LPG 20 is mainly due to the addition of this fuel supply guarantee component.
