#### Explanation

In line with the international developments, the purchase prices for both Mogas 95 and Gasoil LSD are increasing. However, the end-user prices are decreasing as a result of a reduction in the component 'fuel supply guarantee 1b'. This reduction is based on the upcoming alternative use of the refinery's facilities and infrastructure and settlement of a provisionally calculated surplus. Also the tariffs for LPG (cooking gas), as elementary utility, are set on a decreased tariff level.
