**Explanation**

The increase of the electricity tariffs is the result of a decrease in the average fuel expenses for the production of electricity due to a decrease in the fuel prices of Marine Gas Oil (MGO) in combination with the expected production-mix and a higher correction factor for the month of June 2023. The increase of the water tariffs is the result of a decrease of the electricity expenses for the production of water in combination with a higher correction factor for the month of June 2023.
