**Explanation**

The increase of the electricity tariffs is the result of a decrease in the average fuel expenses for the production of electricity due to a decrease in the fuel price of Marine Gasoil (MGO) in combination with the expected production-mix and a higher correction factor of the month January 2024. The decrease in the water tariffs is the result of a decrease in the electricity expenses for the production of water in combination with a lower correction factor of the month January 2024.
